

MONITOR6

FLEET MANAGER

Our unique state of the art platform provides you with all the tools necessary to put you in control.

It's your fleet
gain control!

Using your online dashboard you can set parameters and monitor the activities of every vehicle in your fleet, 24/7 from anywhere you have an internet connection, even from your mobile device.

Real time tracking and locating

Remotely disable and enable the starter

Remotely unlock the doors

The challenge

Your customer is on the phone and wants to know when the order will arrive.

Need an urgent pickup or delivery ?

Your drivers are letting your vehicles idle, costing you money in inflated gas bills and idling violations.

Your drivers are taking to many unauthorized detours and brakes, but you can't prove it.

Which vehicles are due for maintenance.

The solution: Monitor 6

Our state of the art program allows you to:

- Know where your vehicle is located with a glance at a screen.
- With one click know which vehicle is closest to the location.
- Know where and for how long your vehicle was idling.
- Know the exact route, location and duration of stops.
- Receive alerts as to when the next scheduled maintenance is due.

Reports

The MONITOR 6 platform can generate over 20 reports and graphs:

- Last known position
- Engine running time
- Total mileage
- Temp sensors
- Last 10 positions
- Maintenance status
- Non-reporting vehicles
- Trips
- Fuel consumption
- Maintenance costs
- Stops
- Location history
- Events
- Total working hours
- Ignition on/off
- Graphs

Events & alerts

Events & alerts are transmitted in real time by email or text message:

- Speeding alert
- Geo fence
- Power disconnect
- Landmarks
- Towing
- Ignition on /off
- Excessive idle
- Lengthy stops
- Off hours activity
- Late start
- Temp high/low
- Maintenance alert

Benefits of utilizing the MONITOR 6 platform!

- Lower insurance premiums (subject to provider)
- Measure and enhance driver productivity
- Increase safety and security
- Save fuel
- Reduce overtime and maintenance costs
- Increase customer satisfaction
- Automatic rerouting*
- Two way communication with drivers*
- Upload and set routes with Garmin interface*
